

## Drug Information Sheet("Kusuri-no-Shiori")

Injection

Published: 08/2021

The information on this sheet is based on approvals granted by the Japanese regulatory authority. Approval details may vary by country. Medicines have adverse reactions (risks) as well as efficacies (benefits). It is important to minimize adverse reactions and maximize efficacy. To obtain a better therapeutic response, patients should understand their medication and cooperate with the treatment.	
<b>Brand name:</b> Aimovig SC injection 70mg pen <b>Active ingredient:</b> Erenumab(genetical recombination) <b>Dosage form:</b> Injection <b>Print on wrapping:</b>	
<b>Effects of this medicine</b> This medicine binds to the CGRP (calcitonin gene-related peptide) receptor to inhibit migraine-associated pain signals and prevents migraine attacks. It is usually used to prevent migraine attack. It does not relieve migraine attacks that have already occurred.
